

Foreword

As you read and apply the principles and strategies in *Your Life and Your Money*, it will become crystal clear, on a step-by-step basis, how you can become the chief financial officer of your family's finances and secure financial independence.

In my 39 years in the financial securities business, I have read hundreds of books on financial planning and listened to thousands of hours of seminars and lectures. None of the books I've read or the lectures to which I've listened has done a better job of helping the layman understand and utilize financial concepts and strategies.

Scott Feher possesses the exceptional ability to take the mystery out of financial planning. A successful financial planner for many years, Scott impressed me the first day we met, with his uncanny insight on incorporating clients' desires and their feelings about money, family, and love into a dynamic life mission statement that includes a financial plan.

I have been in a unique position to observe the magic Scott has worked with the families he advises. Not only are they empowered financially, they are united emotionally.

Hopefully you will enjoy this book as much as I did, and congratulations on securing your financial future!
